PROMISES	DAYS	DAYS

The arrival of EU funding in Hungary has been delayed for an extremely long time. How many times and when did Tibor Navracsics promise that the money would arrive? The graph shows when he made his promises and what the deadline was. For example, if the government promised to receive the money by the end of the year, the figure shows 31th December, if they promised to receive the money by the first quarter, it shows 31th March.
