Battles

Violence against civilians

Violent events in major ongoing conflicts during the most violent two weeks in the period 27 Oct 22 - 27 Oct 23. Events are grouped in three categories: explosions/remote violence, battles, and violence against civilians. Events are sized according to the number of reported fatalities. The bar plots on the right show the total number of reported fatalities in each category. Data: Armed Conflict Location & Event Data Project (ACLED)
